Admissions Office
Sapienza University of Rome
Piazzale Aldo Moro, 5
00185 Roma RM, Italy

Dear Admissions Committee,

I am writing to express my strong interest in the Master's program in Artificial Intelligence and Robotics at Sapienza University of Rome. With my background in software engineering and extensive experience in building intelligent applications, I am eager to expand my knowledge and skills in an interdisciplinary field that integrates artificial intelligence, robotics, machine learning, and intelligent system design.

Having earned my engineering degree at ESPRIT in Tunisia, I have developed a solid foundation in software development, data analytics, and artificial intelligence. My academic training and practical experience have equipped me with strong analytical and problem-solving skills that enable me to excel in complex technical environments. I have always been fascinated by the intersection of artificial intelligence and robotics and their power to create intelligent autonomous systems that can transform industries and improve people's lives.

The decision to apply to Sapienza University of Rome stems from my desire to study at one of the world's oldest and most prestigious universities, founded in 1303, with a comprehensive program that combines AI and robotics. What draws me specifically to Sapienza is the program's unique blend of theoretical foundations and practical applications in both AI and robotics. The opportunity to work on intelligent systems ranging from knowledge management and big data extraction to robotic systems for industrial and service applications excites me immensely. Sapienza's location in Rome's vibrant tech ecosystem, combined with its reputation as the largest university in Europe with world-class faculty and research facilities, creates the perfect environment for interdisciplinary learning and innovation.

Through this program, I hope to deepen my understanding of advanced machine learning algorithms, computer vision, natural language processing, and robotics technology. I am particularly interested in exploring how AI and robotics can be integrated to create intelligent autonomous systems that can perceive, reason, and act in complex real-world environments. My background in software engineering has provided me with a practical perspective on the challenges of building intelligent applications, and I am eager to expand this expertise into the robotics domain through rigorous research and hands-on development.

Upon completing this program, I aspire to work as an AI and robotics engineer, developing innovative solutions that leverage both artificial intelligence and robotic systems to solve complex real-world challenges. I am confident that the education and experience I will gain at Sapienza University of Rome will prepare me to make meaningful contributions to the fields of artificial intelligence and robotics.

Thank you for considering my application. I look forward to the opportunity to contribute to and learn from the exceptional community at Sapienza University of Rome.

Sincerely,
Hassen Jebri
